

ATTENTION: AVG UPGRADE INSTRUCTIONS

On December 31, 2004, full support for AVG 6.0 was discontinued. It means that if you have AVG 6.0 version, then you are required to update it to AVG 7.0 in order to keep your computer protected from the latest and upcoming viruses.

Following are the steps to do so:

1. Uninstall AVG 6.0 by going to Start> Settings> Control Panel> Add Remove programs
2. select AVG Anti-Virus System from the list and press Install/Uninstall
3. Reboot/Restart your machine
4. Visit webpage <http://free.grisoft.com/doc/2/lnq/us/tpl/v5> and download [avg70free_300a419.exe](#) version 7.300 from the website to your computer
5. Run the downloaded file on your machine. It will walk you through a wizard for standard installation.
6. Update your virus definitions by clicking on UPDATE MANAGER and pressing UPDATE after you have installed the software.
7. You have successfully installed AVG 7.0 and are ready to use.
8. If you have any questions whatsoever about the anti-virus program you can either look up the PDF file at http://free.grisoft.cz/softw/70free/doc/avg_free_reference_en_70_9.pdf or ask the helpdesk.
