PLEASE NOTE: The gallery walls are plaster except for a 34 1/2” high section of oak wainscoting at the bottom and a strip of heavy oak molding that is 94 1/2” above the top of the wainscoting. Extra large framed pieces can be suspended by wire from the oak molding that is 94 1/2” above the wainscoting. In addition, there are four, 5’ wide x 8’ high window panels that are spaced evenly along the south wall and one window panel of the same size located approximately in the middle of the north wall. The window panels are made of 3/4” plywood and are permanently installed so that no external light is admitted. Nails can be used anywhere on the window panels. Track lights are located down the middle of the gallery and along each wall. The two dooes are kept locked at all time except during visiting hours.
